

COGNITIVE HEALTH, MEASURED

# Two products. One clinical boundary.

Six clinically validated instruments.  
Eight minute monthly screening cycles.  
Aggregate insight for organizations.  
Confidential for the employee.

PICK YOUR LANE →

## COGAI WORKFORCE FOR EMPLOYERS, SCHOOLS, AND NONPROFITS

- ▶ Monthly opt in screening
- ▶ Aggregate insight for HR leadership
- ▶ The employer never sees an individual score
- ▶ Six validated screeners
- ▶ A composite R Score from 0.00 to 1.00
- ▶ Workforce trends without exposing individual data

## COGAI MEDICAL FOR CLINICS AND INSURANCE PLANS

- ▶ Validated instruments on a monthly cadence
- ▶ Twelve month trend visibility
- ▶ Crisis flag routing
- ▶ Identified clinical panels
- ▶ Per seat pricing for clinics
- ▶ Per patient per month pricing for plans

## THE SIX VALIDATED INSTRUMENTS

**PHQ 9** Depression

**GAD 7** Anxiety

**PCL 5** Trauma

**AUDIT** Alcohol use

**DAST 10** Drug use

**PSQI** Sleep

## The employer never sees an individual score.

Three contractual commitments,  
enforced by architecture.

01. No PHI leaves the clinical boundary.
02. No therapy notes are ever accessible to the employer.
03. No individual symptom scores are ever accessible to the employer.

That boundary is  
why employees trust  
the platform enough  
to use it.

# Real data. Real conversations.

A 63 year old patient presents after a fall.  
Routine concussion follow up.  
Exam unremarkable. Patient reports feeling "fine."  
The clinician opens the panel.  
The PHQ 9 has drifted from **4 to 13**.  
The PCL 5 crosses the validated **threshold**.  
The trend sits next to the note.

**The conversation that otherwise would not have happened does.**

A follow up plan is initiated the same day.

COGNITIVE HEALTH, MEASURED.

TWO PRODUCTS. ONE CLINICAL BOUNDARY.

BUILT BY CLINICIANS.
